Mr. J. Robert Mann, Jr.
Chairman
E-J Electric Installation Co.
46-41 Vernon Blvd.
Long Island City, NY 11101

Dear Bob,

I am writing to thank you for a wonderful job, once again, on 250 West 55th Street. E-J Electric has always lived up to our high expectations on our new developments, and we know we can always count on you for excellent execution on a complex development project.

Your integrating Trimble Laser Technology with BIM and 3D enabled the project to improve accuracy and productivity.

Your project team exceeded our expectations by installing permanent power to the building four months ahead of schedule, in time for our topping off event. The overall project was completed five months ahead of schedule and under budget.

We look forward to working with you again in the future.

Warmest regards,

Robert Selsam
