Long Island City, NY 11101

**Re: Contract C-26505: Furnishing and Installing Systems and Finishes; Number 7 Line
Flushing Extension, A Division (IRT), in the Borough of Manhattan**

Dear Tony,

I'm writing this letter to convey my pleasure and gratitude for the outstanding performance of your team at the 7 Line Systems and Finishes contract.

Your on-site project management team led by Jay Lender & John Perrotta far exceeded our expectations. The team's dedication, hard work, and late night planning paid off despite the myriad of changes thrown at us by the client. The efforts of Sean Durfee, Stuart Lee, and Joe Davi were greatly appreciated in order to meet the revenue service date. We strongly feel that there is no other electrical contractor that would have dedicated the talent required to keep this project on track. Your team stood behind Skanska and really performed like a true partner in helping us to complete this monumental project.

Your field forces led by Andy Cusumano and Charlie Mancino, were dedicated to the organized and professional performance of the work and they always placed safety at the forefront of every operation. They always went the extra yard to get the job done right.

Thank you for your efforts on the 7 Line, we look forward to working with EJ on future projects.

Very truly yours,

A handwritten signature in black ink that reads "Michael Viggiano". The signature is written in a cursive, flowing style.

Michael Viggiano
