Re: New York Times Headquarters  
WSP Flack + Kurtz Project No N10.00541.10

Dear Bob and the Staff at E-J Electric:

Our firm wants to congratulate your firm for its exceptional performance on the electrical installation for the New York Times Headquarters 52 story tower.

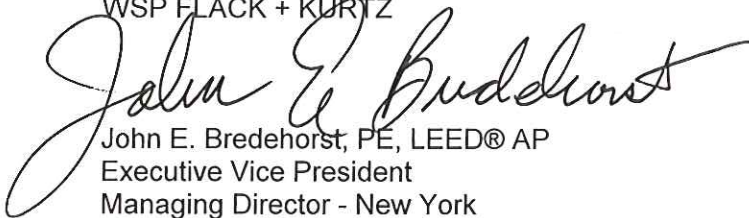

It was a pleasure to work with your crews and competent field engineering staff on this million and a half square foot office tower.

This was a building with an extremely complex and congested core and it was critical for your crew to follow the engineering design and coordinate with all of the other building services. The complex electronic art in the lobby consisting of 560 individual displays broadcasting random quotes is a huge success.

We look forward to many more outstanding projects together.

Very truly yours,

WSP FLACK + KURTZ

  
John E. Bredehorst, PE, LEED® AP  
Executive Vice President  
Managing Director - New York
